OPERATING INSTRUCTIONS

To reduce the risk of electric shock, this mirror has a polarized plug (one blade is wider than the other). This plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not change the plug in any way.

CAUTION: BE SURE DIRECT SUNLIGHT DOES NOT STRIKE MIRROR WHEN LEFT UNATTENDED; REFLECTED SUNLIGHT CAN CAUSE FIRE.

1. Your lighted makeup mirror will rotate 350° so that you can use either the standard view or the 10x magnified view located on the opposite side.
2. Plug into any standard 120 volt wall outlet. To turn on light, simply turn the switch on the line cord to ON setting.
3. After use, always turn the switch to the OFF position and unplug.
4. The beauty and design of this mirror complement any decor. Therefore, you may wish to leave the mirror displayed. However, if you choose to store the mirror, see section about storage for detailed information.

Special Feature

This lighted makeup mirror uses an energy saving lifetime fluorescent bulb. The bulb lasts up to 10,000 hours and does not require replacement.

Storage

Disconnect from electrical outlet. BE SURE DIRECT SUNLIGHT DOES NOT STRIKE MIRROR WHEN LEFT UNATTENDED. Allow to cool to room temperature before storing. Place in cool, dry area out of reach of children, where mirror will not be damaged.

Handle cord carefully to extend life of mirror; do not jerk or strain at plug connections, or wrap cord around mirror for storage. This could cause damage to the cord or a short circuit. To store mirror, coil cord loosely.

Maintenance

Your lighted mirror is designed for household use and is virtually maintenance-free. No lubrication is needed.

If cleaning becomes necessary, disconnect the appliance from the power source, allow to cool and wipe exterior with a damp cloth. Clean mirror surfaces with a glass cleaner. Do not light until you are certain mirror is completely dry. If any abnormal condition occurs, unplug the lighted mirror, allow it to cool, and return it to an authorized service center for repair.

Handle cord carefully to prolong its life; do not jerk or strain at plug connections, or wrap cord around mirror for storage. This could cause damage to the cord or a short circuit. To store mirror, coil cord loosely.

WARNING:
IF YOU THINK THE POWER IS OFF WHEN THE SWITCH IS OFF, YOU'RE WRONG.

KEEP AWAY FROM WATER

Everybody knows that electricity and water are a dangerous combination. But did you know that an electrical appliance is still electrically live even if the switch is off? If the plug is in, the power is on. So when you are not using your appliances, keep them unplugged.
